

1/18/11 FOR IMMEDIATE RELEASE:

NINER ANNOUNCES NEW CARBON FLAT TOP 9 HANDLEBARS

Niner is stoked to offer new carbon handlebars. Bars are carbon-tuned for increased ride quality/comfort, with the same sweep and width as our original Flat Top 9 alloy handlebars. The bars also feature a new \pm 5mm rise/drop, via an offset bulge in the bar's center section, for another way to get a great fit on your bike.

For +5mm rise, Niner carbon bars can be run with the flat section up. For -5mm drop, Niner carbon bars can be run with the flat section down.

RUN THE BAR THIS WAY FOR +5MM HEIGHT:

RUN THE BAR THIS WAY FOR -5MM HEIGHT:

Quality of this product is very important to us. Flat Top 9 carbon bars are covered by Niner's new C5 warranty program, our way of saying that you can be confident in our carbon design and testing. Additionally, claimed weight is consistent with actual weight.

These bars are available in 4 color options that match both Niner frames and non-Niner products. Niner Flat Top 9 carbon bars are in stock, ready to ship to USA Niner Bikes dealers or available online to ship anywhere in the USA. International customers should contact their local Niner dealer.
