

# Rausschlägertruppe | RESET Racing anchor specs (en) (v1.1)

No	Tool component name	ID (mm)	OD (mm)	Width (mm)	RESET Racing product ID	Customization required	Order ID (for reference purposes)	Order date (for reference purposes)	Results of compatibility check
01	SHIMANO	24,3	29,2	18	#6037	No (stock)	n/a	n/a	Perfectly fits Shimano SM-BB92-41 (at step in plastic cup). Does not fit Sram Pressfit GXP Road (just because the center sleeve integrated in the NDS cup is so narrow that the anchor cannot be manoeuvred into place).
02	MULTI30	30,0	36,2	24	#5335	Yes (modified)			Multi-purpose anchor that fits 6806 ball bearings as well as Sram PF30 cups (both V1 and V2; at step in plastic cup, right behind the ball bearing). Furthermore, perfectly fits old (not EPS ready) design of 41 mm Campagnolo UltraTorque OS cups (at flat inner face side of aluminium cup, rubber seal to be removed). Tipp: MULTI30 anchor can also be used for new (EPS compatible) design of Campagnolo OS cups – provided that no EPS-001 center sleeve is installed and MULTI30 anchor is centered through additional guide. (Note: Interference of MULTI30 anchor with BB30 circlips or a possible step in BB86 shells seems unlikely, however to be checked).
03	BB30	30,0	33,1	20	#4510	Yes (modified)	042617	12.02.2016	Perfectly fits 6806 ball bearings (at face side of inner race). (Note: Inevitably, bearings will likely be damaged through removal procedure.) Also fits Chris King NoThreadSet 1-1/8 cups quite well (at inner face side of aluminium cup). Tipp: For 6806 bearing removal, BB30 anchor can be substituted through the more versatile MULTI30 anchor. (Warning: The BB30 anchor should not be used for any Campagnolo UltraTorque OS cups.)
04	SRAM31	30,4	36,2	24	#5335	Yes (modified)	042856	21.03.2016	Perfectly fits new design (V2) of SRAM PF30 cups (at step in plastic cup, right behind the 31/43,5 x 7 mm bearing) and center sleeve (integrated in DS cup). Note: Plastic material at step is rather thin, therefore OD of adaptor is as large as center sleeve permits. Tipp: SRAM31 anchor can be substituted through more versatile MULTI30 anchor.
05	KING30	34,9	39,8	24	#6451	Yes (modified)	042856	21.03.2016	Perfectly fits Chris King PressFit30 cups (at flat inner face side of aluminium cup) and center sleeve.
06	RESET30	37,8	42,1	24	#6451	No (stock)	n/a	n/a	According to manufacturer, fits RESET Racing „PF24“ and „PF30“ cups.
07	CPYEPS	32,0	34,0						Perfectly fits new (i.e. EPS compatible) design of 42 mm and 46 mm (and assumably also 41 mm) Campagnolo UltraTorque OS cups (at inner face side of aluminium cup; no need to remove rubber seal). Warning: Does assumably not work in case EPS-001 center sleeve is installed! (Tipp: CPYEPS anchor can be substituted through MULTI30 anchor if secured and centered otherwise.)
